- To install, click Get.
- The Your Phone app can be located in your Start menu once it has been installed. By clicking Open in the Microsoft Store app, you can also run it immediately.

How To Uninstall “YourPhone” App Using Windows Powershell?

The Your Phone app will be effectively deactivated if you stop it from operating in the background. You’ll yet be capable of opening it manually. If you want to delete it entirely, you’ll have to use Windows PowerShell.

You’ll need to delete yourphone.exe and launch a PowerShell window with administrator privileges.

- Select Windows PowerShell from the Start menu by right-clicking it.
- You can use the Windows PowerShell window to run a command that will disable the components utilized by Your Phone.
- Copy and paste this command “**Get-AppxPackage Microsoft.YourPhone -AllUsers | Remove-AppxPackage”**

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Try the new cross-platform PowerShell https://aka.ms/pscore6

PS C:\Windows\system32> Get-AppxPackage Microsoft.YourPhone -AllUsers | Remove-AppxPackage
PS C:\Windows\system32>
```

- There will be no indication that the Your Phone app has been deleted. If the command is successful, there will be no response in the PowerShell window.

After that, you may need to delete the installation files for the Your Phone app. Open the C: Program Files\WindowsApps\folder in Windows File Explorer to get to these files.

- Look for an additional folder that starts with Microsoft. It will be in the C: ProgramFiles\WindowsApps\folder.
- It depends on the version of the software currently installed on your PC. The folder name will change.
- Look for the folder holding the system architecture tag. It may be mentioned under the YourPhone tag.
- Right-click the folder and select Delete from the menu. It will remove any files associated with the Your Phone software. It includes the yourphone.exe file.
- Allow permission to delete the folder. You may require to press Continue in the Folder Access Denied window.

How To Remove Your Phone App From Windows 10 Background?

Putting an end to the yourphone.exe process will merely make the program unusable till you reboot. You want it to stop loading in the background apps when you restart your computer. You’ll have to turn it off in the Windows Settings window.

- Right-click the Start menu and select Settings app from the menu that appears.
- Select Privacy then Background apps from the Window Settings window.
- There will be a record of background apps that are capable of running in the background.
- Scroll within the menu on the right to find the Your Phone app. To turn it off, move the slider to the Off position adjacent to it.
- The Your Phone app will no more run in the background apps after it has been disabled. Until you manually open the software, it will no longer appear in the Windows Task Manager process list the next time you reboot your PC.
- If you don’t use the app, it won’t show up unless you open it. It will disable it, but it will be ready to use if you change your mind later.
